

SERIALIZATION & TRACEABILITY

Know Where Every Serialized Item Is and Where It Has Been

THE BENEFITS OF SERIALIZATION

SERIAL NUMBER VISIBILITY

Quickly search serialized items and see their current inventory warehouse, and location.

COMPLETE ACTIVITY HISTORY

Track every movement, adjustment, and transaction associated with a serialized item, including the serialized components used to build it.

TRANSACTION VALIDATION

Help prevent errors by validating serial numbers, quantities, and inventory locations during transactions.

FLEXIBLE ERP SUPPORT

Support serialization and traceability in MV2 regardless of your ERP's native serial number capabilities.

HOW IT WORKS

MV2 tracks configured serial-number transactions and builds a searchable history of each serialized item's movement.

CAPTURE

SERIAL NUMBER

Prompt users to enter a serial number or automatically generate one during configured transactions.

VALIDATE

INVENTORY TRANSACTION

Confirm the serial number, quantity, and inventory location before completing the transaction.

TRACK

ITEM MOVEMENT

Record material transfers, consumption, output, and other configured serialized inventory activity.

TRACE

COMPLETE HISTORY

Search by serial number to see its current location and review the associated activity trail.

WITH MV2 SERIALIZATION, YOU CAN:

- ✓ Locate serialized inventory faster
- ✓ Improve transaction accuracy
- ✓ Trace item movement by serial number
- ✓ Maintain a detailed activity trail
- ✓ Strengthen inventory visibility
